BODU HITHI

Introduction to Sustainability at Coco Bodu Hithi

Thoughtful Actions, Lasting Impact

At Coco Bodu Hithi, we believe sustainability is a shared journey. From reef restoration and waste reduction to community wellness and mindful energy use, our efforts reflect a deep respect for nature and people alike. We take mindful steps every day to care for our island, community, and planet.

Our Green Commitments and Initiatives

Naturally responsible

Energy Efficiency:	Our resort is transitioning to smart systems and energy-saving appliances.
Water Conservation:	We bottle drinking water in-house and operate our own water production system.
Waste Reduction:	All single-use plastics have been removed in favour of eco-friendly alternatives.
Well-being:	Through our Nurturing Minds campaign, we support our team with yoga and meditation, and work with local health organisations to uplift island communities.

Guest Involvement Makes a Difference

Every action counts

Coral Restoration: Led by our Marine Biologist, coral nurseries help regenerate reefs and preserve marine biodiversity.

Education & Involvement: Weekly talks, marine experiences, island clean-ups and guest involvement deepen under standing of our oceans.

Together for a Greener Tomorrow.

Every stay contributes to healthier ecosystems and a stronger community. Thank you for being part of our sustainability journey.

Explore more on our COCO CARES blog or speak to a team member about how you can contribute during your stay.
