Introduction to Sustainability at Coco Palm Dhuni Kolhu

Embracing a Greener Future, Together

At Coco Palm Dhuni Kolhu, sustainability is more than a practice. It is a way of life. It is who we are. Every detail, from our daily operations to long-term goals, is shaped by our dedication to preserving the natural beauty of the Maldives. With care for the environment, local communities, and future generations, we proudly champion responsible travel.

Environmental Practices & Energy Conservation

Protecting the Environment, One Step at a Time

Eliminating Plastic: All single-use plastics, including bottles, bags, and cups have been removed in favour of eco-friendly alternatives.

Water Conservation: On-site water production reduces bottled water use and lowers our environmental footprint.

Recycling: From paper to wood, materials are reused or repurposed wherever possible.

Energy Efficiency: We have implemented motion detector lights, energy-saving bulbs, and mindful air-conditioning practices to reduce energy use.

Waste Management, Organic Farming & Community Outreach

Turning Waste into Resources & Giving Back

Waste Management: Kitchen waste and coconut husks are transformed into compost, supporting our lush gardens.

Island Farming: We incorporate fresh herbs and organic, home-grown produce from our very own Coco Farm cementing our commitment to sustainability and cutting down on food miles.

Community Engagement: We donate fertilisers, support local artisans, and work closely with schools on sustainability.

Eco Events: Guests are invited to join meaningful moments like Earth Hour, Earth Day, World Turtle Day, World Ocean's Day and more

Protecting Our Oceans, Preserving Our Future

Protecting Our Oceans, Preserving Our Future

Coral Restoration:	Led by our Marine Biologist, coral nurseries help regenerate reefs and preserve marine biodiversity.
Research Support:	We work with researchers to monitor local sea turtle and manta ray populations.
Turtle Nest Protection:	Nests are monitored to ensure safe hatching and release into the wild.
Turtle Rehabilitation:	In partnership with Olive Ridley Project, we protect and monitor nests of three sea turtle species, collecting data to study nesting patterns.
Education & Involvement:	Weekly talks, marine experiences, and guest involvement deepen under standing of our oceans.
#ProtectMaldivesSeagrass Campaign:	Since 2019, we have been protecting a vital habitat now frequented by endangered sharks, rays, and turtles.

Join Us in Making a Difference

Every Action Counts

At Coco Palm Dhuni Kolhu, each guest plays a part in our sustainability journey. From small daily choices to unforgettable conservation experiences, your involvement helps protect the Maldives for generations to come.

Get Involved. Stay Informed. Make an Impact.

Explore more on our COCO CARES blog or speak to a team member about how you can contribute during your stay.
